

ANOTHER IMPORTANT STEP IN YOUR FLOORING PURCHASE?
CHOOSING A QUALITY QUICK-STEP® UNDERLAYMENT.

As a leader in laminate flooring technology, Quick-Step® knows the importance of choosing a quality underlayment in creating a beautiful floor. While an inadequate underlayment can create flooring problems, a premium underlayment will not only protect your floor, it will increase your everyday enjoyment by creating a more realistic wood sound.

Quick-Step® has formulated three quality underlayment options that set the standard for excellence. Each is designed to protect your flooring investment while offering unique sound benefits, moisture protection and ease of installation. Our premium underlayments are the perfect solution for any floating floor system. If you purchased a Quick-Step® floor, remember that you are required to use one of these underlayments to protect your flooring warranty.

Now that you've chosen the perfect floor, take the time to choose the perfect underlayment. Ask your flooring retailer which Quick-Step® underlayment is right for your specific needs and budget.

A BEAUTIFUL FLOOR STARTS WITH A QUALITY QUICK-STEP® FOUNDATION.

Along with our quality underlayment options, Quick-Step® also offers two additional products designed to create quality, high-performance results in challenging situations.

QUICK-STEP® SCREEN

- » Protects floor from rising moisture
- » Reinforced construction for extra strength
- » Large surface area results in fewer seams
- » For use with Uni Softboard and Quick-Step® Linessse Collection

UNI SOFTBOARD

- Used to level out uneven floors.
- » Provides an extra leveling effect on uneven subfloors — ideal for historic homes or older wooden floors
- » Specially impregnated wood fibers conform to uneven subfloors
- » Always use with Combi Floor, Combi Floor Plus or UniSound Combi Floor to satisfy warranty requirements
- » Warranty is the same as for your Quick-Step® floor

QUALITY QUICK-STEP® UNDERLAYMENTS

With a heritage of style and innovative technology, Quick-Step® is known for transforming both the style and substance of today's flooring. The direct-pressure laminate technology that we pioneered is the industry standard. Our patented Uniclic® locking system revolutionized the industry. And our specially formulated underlayments set the standard for quality performance — no matter what floors are installed on top of them.

amazing what a floor can do..

BETTER

QUICK•STEP® COMBI FLOOR PLUS

Everything you need in one quality underlayment.

This unique, three-in-one underlayment offers superior sound-absorption, a moisture barrier and embossed self-leveling.

- » IIC and STC rating
- » Reduces hollow tapping noise, producing a sound that is closer to actual hardwood — and transmits less sound to adjacent rooms and rooms below
- » Provides a self-leveling effect for better sound and protection of floor
- » Pre-attached moisture barrier helps protect floor from moisture damage
- » Material prevents mold, mildew and bacteria growth
- » Nonallergenic for a more comfortable home
- » Easy to install with an attached overlapping lip and tape
- » Safe for underfloor heating
- » Meets warranty requirements
- » Warranty is the same as for your Quick•Step® floor
